**Leigh Park Community Centre  
Leigh Park Way  
Westbury  
Wiltshire  
BA13 3FN**

Defibrillators will be available round the clock and are used to give a high energy electric shock to the heart through the chest wall to someone who is in cardiac arrest. A defibrillator can be used by anyone, you don't need any training. They have a monitoring system that will be checked regularly by the Town Caretaker.

On the HeartSafe website you can check the location of Defibrillators, this link will take you to the page: [www.heartsafe.org.uk/AED-Locations](http://www.heartsafe.org.uk/AED-Locations) where you will also find the useful information below from HeartSafe:

1. Wherever you live, wherever you work, simply knowing the location and postcode of your nearest Public Access Defibrillator may save valuable seconds when ringing the Emergency Services to report a suspected SCA.
2. The Emergency call taker may not be local to your home or place of work. The quickest way to inform them of your nearest Public Access Defibrillator site is to give them the postcode of where the cabinet housing the defibrillator is located.
3. We recommend you store the postcode of the nearest Public Access Defibrillator cabinet on your phone, wallet and by your telephone at home/work.
4. Some external defibrillator cabinets are unlocked, some are locked and require an access code. The Emergency Services will provide you with the access code as soon as they can identify the cabinet you are referring to and make the decision it is appropriate to instruct the caller to obtain the defibrillator.
5. Saving seconds can save lives. Please record this **simple postcode** information, it may help in an emergency.
