

## **Household Recycling Centre – Refurbishment Programme**

### **Introduction**

The current contract for the management of Wiltshire’s household recycling centres with Hills Waste Solutions ends in October 2017.

The council invited tenders for this service to ensure best value for Wiltshire residents. Following this tender exercise, the council awarded a contract to FCC Environment for the management of nine household recycling centres which are owned by the council. Hills Waste Solutions currently own and operate Purton and Lower Compton household recycling centres under contract to the council and will continue to do so.

The transfer of the nine council-owned recycling centres to FCC Environment will take place on 2 October 2017.

FCC Environment and the council then plan to carry out a phased programme of site improvements during October, November and December. Each site will be closed for between one and two weeks to allow for these improvement works to take place.

The closure programme aims to ensure that disruption to residents is kept to a minimum. Works are expected to be completed by the end of the year.

### **Refurbishment Programme and Closure Dates**

FCC Environment start managing the operation of the recycling centres on 2 October 2017. Between October and December 2017 all Wiltshire Council owned household recycling centres (all sites apart from Purton and Lower Compton) will be closed for between one and two weeks in order for the sites to be refurbished and completely transferred to FCC Environment.

The refurbishment programme and closure dates are shown in the table below. This programme is being undertaken at the quietest time of year for the sites and aims to ensure that residents have access to another site locally therefore reducing the disruption as much as possible.

Apart from during the closure period for refurbishment, all sites will be operating the normal opening days and hours. We will therefore be actively encouraging residents to check the website to see which local sites are available before they travel.
